

Stereo One – Heavy compact-sound

SWEDEN: Bild och Ljud Hemma, no 9 2005

Total grade: 9 out of 10

“What happens when a well known loudspeaker manufacturer decides to build something small that swings? Well, you get Stereo One from Audio Pro. Finally a compact hifi-system for music lovers!”

“The latest creation from Audio Pro testifies on a new way to think. Here, the well known loudspeaker manufacturer has used its skill to construct a compact sound system, focusing on sound quality. The speakers comes from their own product range, and to gain that little extra bass, they have used their very own ace-bass solution, raising the bass level. The speakers are driven by a CD-receiver with 2 x 33 watt onboard.”

Sound

“The sound image is large, and the instruments exactly placed. The treble is without doubt the clearest we have ever heard from a compact sound system and the mid range has a well articulated reproduction of voices. But maybe it is the bass that impresses most. It is decisive, and full, not tired or bombastic. Here the music has a solid base to stand on!”

Conclusion

“There are many exciting products for all that have a limited amount of space and money, but few systems have the sound quality of the same caliber as Stereo One. A brilliant alternative to your living room, kitchen, or leisure house.”
