

Living LV2

Sweden: Hifi & Musik, no 7-8, 2010.

“A winning concept”

“Nowadays it’s more common with music on the computer and Audio Pro has the right timing for wireless products. Easy, convenient...with good sound!”

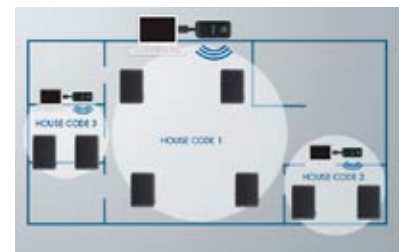

“It’s almost impossible to fail in the setup of LV2, because the only thing you need to do is to connect the loudspeakers to a wall socket and connect the dongle in a USB port. The installation goes fast and automatic.”

“On the dongle as on each speaker there is a switch marked House Codes. You can divide between three different channels to give you the opportunity to have three separate audio networks at the same time. On the remote expect for the Master volume there are three zone volumes, and each speaker pair can be programmed to adjust volume separately in each zone. The possibilities are endless, and the same time it’s almost unreal how easy the system is to use.”

“Audio Pro Living LV2 has a tight and firm bass, a detailed and pleasant midrange and a tweeter which feels airy and fine.”

“LV2 are not basically built for critical listening but rather filling a room with good sound.”

“It sounds almost too good no matter where I am in the room, and just the flat frequency response independent of the placement of the loudspeakers is fascinating. It doesn’t matter where the loudspeakers are placed or where you are exactly sitting or standing the sound is incredibly good all the time!”

Advantage

Good sound
Neat
Easy setup

Disadvantage

No floorstanding...yet!

Conclusion

Audio Pro is breaking new grounds with Living LV2 when it comes to computer speakers, and even if there are alternatives LV2 is a given winner with the combination of easy setup, tastefull design and good sound!
